

Safe T Bar, Inc. - Safe T Ring™ Concealed Mounting Kit

Safe T Ring™ Concealment Kit

Safe T Rings™ special design, utilizes a superior adhesive, the concealment ring adheres directly to the top of the mounting flange of the grab bar. Which eliminates the bacteria harboring problem found in the air space in concealed mountings, thus producing a sanitary ring as durable as the finished bar that does not have to be removed for cleaning.

Safe T Ring™ Concealment Kits

Durability/Test Example:

The Safe T Ring™ concealment has and still continues to be tested, since 1989 in temperatures of -30° to 100° F, humidity, rain, snow, ice, and sun exposure. The Safe T Ring™ concealment is mounted in two different areas on the outside of our building, located in Minnesota. These concealment look as if they were installed today. The adhesive was specifically designed to be incredibly strong, sanitary, and initially pliable more than once and then become permanent within 72 hours. Another unique and quality product from Safe T Bar, Inc. Our Safe T Ring™ concealment.

Benefits of Safe T Ring™ Concealment:

- **Safe T Ring™ has NO AIR SPACE it is Sanitary** eliminates the bacteria harboring air space found in other concealed mountings.
- **Safe T Ring™ can be added to any Safe T Bar, Inc. grab bar any time.** No need to purchase a new grab bar for concealed mountings.
- **Safe T Ring™ saves your inventory cost.** No need to carry an exposed mounted and concealed mounted grab bar, only need to inventory a few Safe T Ring™ concealment kits.
- **Safe T Ring™ concealment options are Endless, without any extra cost to you.** Either being classic or creative with your Safe T Ring™ concealment, the choice is yours, without the special price tag.
- **Safe T Ring™ concealments will not damage the surface (knuckle) of your grab bar.** Your grab bar will be safe and cosmetic addition to any area which needs a firm hold.
- **Safe T Ring™ concealments become permanent within 72 hours.** Other concealments become loose and do not stay firmly mounted to the flange.

No reports have been made on the adhesive not adhering, bubbling, or peeling, when properly applied. Safe T Bar, Inc. stands behind our concealed mountings 100%, when properly installed. There as durable as the grab bar surface.

Installing our Safe T Ring™ concealment rings:

- **Securely install grab bar onto appropriate mounting wall conditions.** (If required please check the local building codes).
- Once grab bar is mounted. **Clean application surface (top of flange). Surface need to be clean from dirt, natural oil and or any other applicable oil and dirt.** (Ex: Rubbing alcohol and allow surface to completely dry before applying.) **This will ensure a proper adhesive bond.**
- **Do Not Bend your Safe T Ring™** for a flawless finish.
- **Safe T Ring™ not straight?** The adhesive was designed to be pliable more than once, lift up and reapply for the flawless finish. Within 24 to 72 hours the Safe T Rings™ becomes permanent.
